WENERATOR

This revolutionary device provides a convenient solution to food waste problem. It is not only compact and discreet but also user-friendly, making it an ideal choice for busy commercial kitchen. The automated systems make it a breeze to operate, allowing users to simply 'set and forget'.

After use, the treated liquid digestate can be used as a fertilizer or connected to the sewer line, making it an easy, hygienic and odour-free option. With its aesthetically pleasing design, this device makes a great addition to any space,

"A hassle-free premium source-level waste management appliance with added savings in cooking fuel"

KEY FEATURES

Patented Hydrolysis Pretreatment Cycle

Flexible Installation

Safe, Hygienic, and User-friendly

Automation Functionality

Clean High Quality Gas

Easy Slurry Handling

CUSTOMER BENEFITS

- ROI in 3 years
- Clean Quality gas for Commercial Kitchen
- Aesthetically pleasing & Easy to use
- Source Level Waste Handling
